GIT, GitHub, GitLab

Adobe XD, Figma

Adobe After Effects, Photoshop

Rhino, SketchUp (3D modelling)

SQL, MongoDB, Prisma

Vercel, Heroku, CI/CD

## ABOUT ME

Passionate about **frontend development and UX/UI**. I have started learning coding in 2019. As I am an architect - I know 3D modeling, **design tools** and have aesthetic sense. Civil engineering taught me how to solve problems and **think analytically**. I love psychology and self-development. I am a traveler who has seen many faces of humanity and can be empathetic, which helps in UX designing.

## Education

### 2013 - 2019 **Civil Engineering, bachelor**

*Lublin University of Technology, Poland*

During my studies I was a year-representative and I got a scholarship.

### 2012 - 2016 **Landscape Architecture, bachelor**

*Lublin University of Life Sciences, Poland*

## Work History

### 2022 - present **UX Designer / Frontend Developer**

*Change Equity, Sweden (remote)*

The project name is Noterat.io. It's a user-friendly application that distributes and analyzes the available data on the Swedish Parliaments (Riksdag) API and website. Our aim is to create an informative and neutral platform where the users can easily access and control specific documents and political activity without ending up in filter bubbles. I have been creating a design in Figma and helping other developers with coding features in React and TypeScript.

### 2022 - present **Full Stack JavaScript Developer Consultant**

*School Of Applied Technology, Norway*

Technical skills include JavaScript, React, Typescript, Three.JS, Next.JS Node.js, Express, HTML5, CSS3, Databases incl. MongoDB and PostgreSQL, Tailwind, UX/UI and general development tools such as Git, Vercel, REST, Docker, Redux, TDD and CI/CD.

### 2021 - 2022 **self-employment**

*HOMIA, Poland*

Freelancer. Making websites mockups and graphics. Coding websites.

### 2020 - 2021 **Architect, Brand Manager**

*ScandyHouse, Poland*

<http://scandyhouse.com/>

I created a brand of a company offering construction services and selling prefabricated houses. I was researching the market, looking for new solutions and taking into account the needs of customers. Together with contractors, **we had been constantly devising automation solutions.** **I had been creating the website from a scratch - from logo, graphic design to programming (Corel Draw X7, Adobe XD, HTML, CSS, PHP, JavaScript).**

## Skills

- problem solving
- critical thinking
- teamwork
- creativity

## Languages

- Polish - native
- English - C1
- German - A1
- Spanish - A2

2015 - 2020
